Education

JIS College of Engineering

Bachelor of Technology in Computer Science & Engineering (AI/ML) – CGPA: 8/10.0

Kalyani, West Bengal

Expected May 2027

Tarasundari Girls High School

Indian School Certificate (ISC) – Percentage: 80% — ICSE – Percentage: 91%

Nabadwip, West Bengal

2021 – 2023

Technical Skills

Programming Languages: Python, Pandas, Matplotlib, Seaborn, Excel, Power Bi, SQL

Database & Tools: MySQL, PostgreSQL, Git, GitHub, VS Code, Power Bi, Excel

AI/ML Frameworks: TensorFlow, Scikit-learn, Pandas, NumPy, Natural Language Processing (NLP)

Core Competencies: Data Analyst, Machine Learning, Data Structures, Algorithms

Experience

Full Stack Developer

Aug 2024 – Present

Byte Gurus

Remote

- Architected and developed end-to-end web applications using React.js, Node.js, and MongoDB, serving 500+ active users with 99.5% uptime
- Implemented RESTful APIs and optimized database queries, reducing page load times by 40% and improving overall application performance
- Developed responsive UI components with modern CSS frameworks, achieving 95% mobile compatibility across devices

Club Coordinator

Aug 2024 – Present

Tech Defenders Club, JIS College of Engineering

Kalyani, West Bengal

- Led a team of 20+ members in organizing technical workshops and hackathons, increasing club participation by 60%
- Coordinated with industry professionals to conduct 8+ technical sessions on emerging technologies including AI/ML and cloud computing

Data Visualization Analyst (Virtual)

Jan 2026

Tata Consultancy Services via Forage

Remote

- Designed interactive data visualizations and dashboards for executive leadership, enabling data-driven decision making for business insights
- Prepared strategic questions and conducted data analysis presentations for C-level stakeholders, demonstrating strong business acumen

Projects

FakeBuster AI – Misinformation Detection System | Python, NLP, TensorFlow, Flask, React.js

Oct 2024

- Built a machine learning web application utilizing NLP and deep learning to classify news articles as FAKE or REAL with 92% accuracy
- Trained LSTM neural network on 50,000+ news articles, implementing TF-IDF vectorization for feature extraction

Data Analytics Project – Customer Behavior Analysis | Python (Pandas, Numpy), PostgreSQL, Power Bi Jan 2026

- Identified customer behavior patterns and trends
- Built clean, interactive, and business-focused dashboards
- Presented insights in a clear and professional format

Achievements & Leadership

1st Place – App-e-teaser Competition: Won college tech fest app development competition among 50+ teams, demonstrating superior full-stack development and problem-solving skills

Open Source Contribution: Active contributor to open-source projects with 100+ GitHub contributions in the past year
